

Paid Strategy and Management Consulting Summer Analyst, Arlington, VA

Who are we?

A high-end consulting firm focused on the **aerospace, defense, space, intelligence, and government services markets**. Our team provides **corporate strategy development, market insight, and M&A due diligence services** to global corporate, private equity, and investment banking clients.

Why Renaissance Strategic Advisors?

We are a 30 person industry-focused team with locations in **Washington DC, New York, and London**. We work with clients spanning from startups to the leading global A&D companies. We offer competitive compensation and upward mobility in a demanding yet rewarding work environment.

Entry-level Analysts will join a group of multi-disciplinary senior consultants with decades of experience in the sector. They will work to support our global client base alongside talented peer analysts, associates, and senior staff. Analysts are fully **integrated members of project teams and provide direct input into deliverables and client briefings**. Daily activities will include primary and secondary source research, building market and financial models, and creating client presentations / deliverables. **At Renaissance Strategic Advisors:**

- Summer Analysts partake in a weeklong training program that includes functional skills in Excel and PowerPoint, advanced research methods, consulting tradecraft, and industry / sector knowledge
- Each Summer Analyst receives a mentor, ensuring individual attention and senior interaction
- Summer Analysts complete client-billable work and participate in the development of internal firm IP
- Summer Analysts also have the opportunity to lead an independent research project and take ownership of the deliverable, culminating in a firm-wide presentation to senior management
- We are a tight-knit team that takes great pride in maintaining our dynamic and fun culture

Who are we looking for?

We recruit at **top-tier undergraduate institutions**. Successful candidates must demonstrate:

- A passion for the aerospace, defense, space, government services, or related technology sectors
- Strong analytical skills and comfort with both complex quantitative analysis and problem solving
- Curiosity, energy, positivity and the ability to work in teams and under dynamic conditions
